PhotoViolationMeter™ Invades San Francisco *San Franciscoites will Get to Enjoy the World's Friendliest Parking Meter*

Vancouver, BC - Photo Violation Technologies Corp. ("PVT"), a leader in technologically innovative parking meter solutions, is proud to announce the first PhotoViolationMeter™ to land on US soil will be installed in the Port of San Francisco during a parking meter trial. The PhotoViolationMeter™ will take part in the demonstration project from December to April on Chestnut Street, west of internationally recognized landmarks such as Fisherman's Wharf and Pier 39, flourishing tourist sites.

Despite its name, drivers are calling the PhotoViolationMeter™ ("PVM") "The Worlds Friendliest Parking Meter™" as it eliminates the common frustrations of paying for on street parking and the worry of receiving a parking violation. The PhotoViolationMeter™ provides a number of user-friendly features, which eliminates the stress of receiving a parking violation, and informs you of when not to park, prevent the towing of your vehicle.

Drivers will no longer be frustrated by a lack of change or be able to use it as an excuse. The PhotoViolationMeter™ accepts all forms of payment with its **Every-Way to Pay™** feature. The PVM™ allows drivers to pay for their parking with coins, bills, credit cards, debit cards, smart cards, and phone if the cities activate all the payment options.

The **No-Fine™** feature provides drivers the option of allowing the PhotoViolationMeter™ to add time incrementally onto their credit cards. For a small fee, it gives drivers the peace of mind that they will never run out of time on their parking meter.

For drivers who do run out of time, the **Grace Period™** feature enables them to pay for expired time, rather than the meter issuing them a violation. If the drivers do not return to their vehicle within the grace period, the **PayYourFine™** feature gives drivers the option of paying for their fine at the meter at a discounted rate.

The **Instant Notification™** feature notifies drivers of free and event parking times and also warns drivers of rush hour and no parking times by not accepting payment, which prevents their vehicle from being towed away. How many times have you paid the meter to come back and found your vehicle towed because you were in a rush and did not see the sign?

Photo Violation Technologies Corp. built the PhotoViolationMeter™ with benefiting the drivers as a priority. The meter is located at every stall, it makes it easier for drivers to pay for their parking unlike the current Pay and Display machines in use. The Grace Period™ feature, No-Fine™ feature, PayYourFine™ feature and Instant Notification™ feature are implemented to minimize the chances of drivers receiving violations.

The PhotoViolationMeter™ will restore fairness and ensure everyone pays for parking. For violators that do not wish to pay for parking, the PVM™ will issue a PhotoViolation™ automatically and send it in the mail.

Photo Violation Technologies Corp. is a private Canadian corporation, with subsidiaries in Europe and Asia that has developed a patented, technologically innovative parking meter system - the PhotoViolationMeter™. Photo Violation Technologies Corp. has successfully forged relationships

with Fortune 500 companies and global suppliers such as IBM, Honeywell, and Motorola. These relationships ensure the future success of Photo Violation Technologies Corp. on a global scale. Photo Violation Technologies Corp. is proud to be working with these partners to develop the most sophisticated parking system. Together we are *Revolutionizing the Parking Industry™* by *Perfecting How People Park™* through the PhotoViolationMeter™ solution. The Port of San Francisco is responsible for seven and one half miles of waterfront adjacent to the San Francisco Bay. The Port is responsible for the development, leasing, marketing, administration, management, and maintenance for the waterfront property. Its jurisdiction reaches from along the waterfront from Hyde Street Pier in the North to the India Basin in the South. The Port's operating portfolio is composed of over 550 ground, commercial, retail, office, industrial, and maritime industrial leases, with internationally recognized landmark such as Fisherman's Wharf, Pier 39, the Ferry Building, and the AT&T Park. The Port operates close to 1,000 parking meters within its 45 city blocks. These meters collect approximately \$1.4 million USD every year. In-house staff provides maintenance for the meters as well as collects revenue from it. The Department of Parking and Traffic enforces parking along these areas and generates \$1.2 millions USD annually in parking citation revenues. Please visit www.sfport.com for more details on the Port of San Francisco.
